STREAMLYNE
FundFit

What do **FundFit AI** user institutions miss about their old **opportunity search funding** tool?

Absolutely Nothing.

With real time AI insights, nearly endless funding opportunities, millions of researchers, and the latest foundation, corporate, and federal opportunities, FundFit AI is in a class of its own.

✖ Here's what you won't find here:

Bloated databases with long-expired opportunities.
We train FundFit weekly on new opportunities and focus specifically on what's new and open across thousands of sources.

AI in name only because it sounds good.
We rebuilt FundFit from the ground up to take advantage of the latest AI technology at every turn, including customized results.

Old keyword-based approaches that get you stuck.
Want to get specific with your searches? Leave keyword-based searches (not AI) behind and open up a world of possibilities with true AI.

Loosely relevant results without any context.
All of FundFit AI's results are fine tuned and tailored for our users, so each admin or PI can get to exactly what they're looking for, with guidance.

Recognition for community users only.
Because of our certified ORCID partnership, FundFit has already trained up on 1.2 million researchers (soon to be 3 million), including your own institution, far beyond our user base only.

See FundFit AI for yourself by requesting a custom demo.

THEN MAKE THE SWITCH.
