

## How To Use Streamlyne FundFit

Here are just a few of the many popular features that are available to FundFit users from the moment the setup is implemented:

- ☐ Use the open keyword search or customizable filters to pinpoint a specific opportunity to explore
- ☐ Submit the opportunity to FundFit's proprietary scoring system to determine the best fit researchers on your team
- ☐ Evaluate the intelligent insights provided about your own researchers and potential external collaborators
- ☐ Create one or many possible team scenarios out of the recommendations made and finalize the best fit team
- ☐ Search for opportunities tailored to individuals on your team based on their research backgrounds and expertise
- ☐ Use proposal data from your own institution to populate profiles with valuable non-public information and / or:
- ☐ Connect profiles to ORCID to add research information all at once, such as proposals, awards, publications, and bio-sketch data

Q: I'm interested in a Streamlyne FundFit demo. What do I do?

A: Let a Streamlyne representative know or send a request: [fundfit@streamlyne.com](mailto:fundfit@streamlyne.com)

## Welcome to Streamlyne FundFit

Streamlyne FundFit is a thoughtfully developed, next-generation teaming resource. It intelligently replaces tedious funding search processes and underperforming tools with tailored analysis. FundFit allows you to construct and compare the strength of research teams for specific funding opportunities. As a result, your researchers can spend time pursuing funding that is relevant and obtainable, saving time and resources.

## What Streamlyne FundFit Does

Streamlyne FundFit harnesses AI and Machine Learning to assess your team's strengths and capabilities. Then it matches your own researchers to the best open funding opportunities. All you have to do is approve what the system comes up with, or fine-tune to your liking. Join other leading universities already using FundFit to guide and inform their department or institution's funding efforts.

Here are examples of what you can accomplish:

- Match funding opportunities to the skills & backgrounds of your current PIs
- Search for opportunities best suited to your most underutilized researchers
- Identify the most suitable potential collaborators at other institutions with complementary expertise to your PIs
- Use What-if Scenarios to create your institution's "A Team" for any given opportunity out of a diverse pool of researchers
- Sync researcher profiles with ORCID accounts so FundFit profile information can be imported and maintained easily

### Has this funding been awarded?

As soon as you know the outcome, please mark it accordingly.

We won - move to active projects

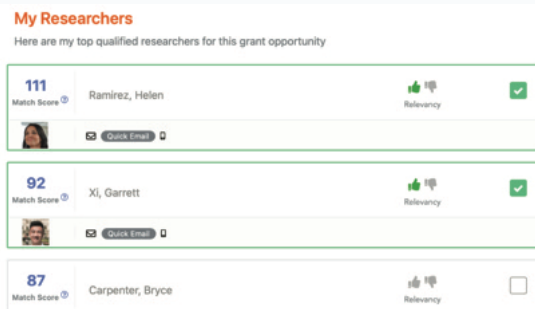

Congratulations! Please confirm a few details so we know about the value you received from the FundFit system. ↓

## How Streamlyne FundFit Works

Streamlyne FundFit is the innovative tool you need to help secure funding for your research program. Imagine Machine Learning and our proprietary process working together to assemble your best fit research teams. And it all happens within minutes. FundFit's primary focus is intelligent researcher team building, as well as internal and external collaborations to increase the odds of winning funding.

One key objective of FundFit is to virtually eliminate systematic bias, including seniority and other inadvertent biases, to create more diverse and inclusive research teams. By bringing rising talent to the forefront alongside senior researchers, FundFit aims to level the playing field for visibility and recognition of deserving researchers across your entire program.

With each upcoming FundFit release, there will be new features and functionality that makes pursuing funding easier, faster, and more enjoyable than it's ever been before.

## The Power of Streamlyne FundFit

Streamlyne is consistently recognized as one of the most trusted and established enterprise software providers for research administrators, leading the industry with proprietary features, world-class service, and unparalleled uptime. Our innovative solutions continually enable thriving research programs to grow and advance in new ways. Our Streamlyne FundFit offering creates stronger and more balanced research teams, which is essential in competitive funding scenarios.

**Q: Will FundFit provide insights about my own research team?**

A: Yes! FundFit will show you interesting insights about your own researchers, in real time, and within seconds of initiating a session.

**Q: Can I use FundFit to help determine which funding opportunities my research department goes after?**

A: Yes, FundFit will help you evaluate, prioritize, and pursue funding with guidance from our proprietary system. This may help to give your institution a competitive advantage by putting your best suited researchers forward for the right opportunities.

**Q: If I already have an Opportunity Search tool such as Pivot, GrantForward, or SPIN, can I still keep it and also adopt FundFit?**

A: Yes, if you already have a tool you like, you can continue using it at your option in conjunction with FundFit's unmatched power to build dream research teams. However, if you're like other FundFit users, you'll likely find that FundFit's curated Opportunity Search and intelligent team matching simply can't be replicated elsewhere.

## Our Complete Software Suite

*Funding · Team Dynamics*  
Leverage your research team through competitive insights

*eRA System*  
Manage every aspect of your research administration program

*HERD Visualizer*  
Interactive visualization studio of HERD dataset and more

*Advanced Data Insights*  
Uncover new metrics to inform data-driven decisions
